ABSTRACT

Some of the greatest free thinking minds in the world are warning of the biggest market/currency collapse and debt explosion in history. The consequences of this crash will result in the greatest financial depression and reset in the history of humanity. I do not disagree with their opinions and research. I disagree with their timing. Many say it is imminent before 2020 or just beyond. Their reasoning is because we are now going into the 10th year of this existing bull run, which typically runs in 7 year cycles. Makes sense?

I thought so, and in 2015 I thought that as well, but look at what has happened. The Federal Reserve still manipulates interest rates and money printing while stock buybacks continue at an incredible rate. The markets have since hit all-time highs (a reason why some believe Trump is part of the system, however, I do not). What we see in reality is opposite of the elite plan going into the 2016 election with Hillary in office. God intervened. God answered prayers. Trump will lead the USA forward with the surprise “Draining of the Swamp” we have all been hopefully expecting. This will energize not only the Trump and conservative movement but all Americans who believe in liberty. Momentum in the economy, promising trade deals, and a high level of low to elite class investing (combined with record amounts of buybacks) will carry the DJIA to unfathomable heights.

This presents a great opportunity, but by the time Trump is ready to relinquish his executive powers in 2024, the New World Order (NWO) will go back to their original plan to crash the markets. Why? At this time, the elitists would have sold off their stocks and left the public with the hyper-inflated stocks that no one wants to buy or can afford to buy. If they can pull the plug on the markets they will completely destroy their greatest enemy, the American middle class, by stealing their wealth built on the faith of Trump’s policies and promises. I am sure they will blame Trump too. Those who lose the least will be the best off, this is the warning!

————— www.CIADC.co —————

1. A SURPRISING CHANGE OF MIND

Anyone who has consulted with me in the past knows that I have always taken a pessimistic stance on traditional markets. Previous to this Special Report, the official CIA Diversification Recommendation was to avoid the traditional markets. The overextended bull run since 2008 (without any correction) fueled by low interest free-money policies, continued quantitative easing (FED FLUFF), and aggressive buybacks have led to hyperinflated valuations. Many middle class investors cannot even afford to buy a share of a blue chip stock for each one of their fingers and toes, much less for their children's college fund. So much for diversification. It is a recipe for disaster not growth, and eventually, it will all come tumbling down. Markets always correct, even manipulated ones!

Some of the smartest and most successful thinkers and investors in the world like Jeff Berwick (The Dollar Vigilante), Max Keiser (RT News), and Ron Paul (Liberty Report) are still predicting this epic overdue market cycle crash. This crash will most likely include the crash and revaluation of the dollar. Yes the mighty Petro-Dollar¹ will lose its status as the world's number one reserve currency as a result of digital quantitative easing (printing dollars and even worse just typing in desired numbers into blank spaces on the centralized computer ledger) to the point where the dollar's true purchasing power is approx. \$0.11. The purchasing power adjustment will come to fruition with the revaluation. Many nations, like Russia and China, are actively seeking ways around the dollar (especially China buying oil from Iran²) and have publicly claimed to be working towards de-dollarization³. As you could imagine, the whole world will feel the domino effect of shockwaves as sovereign national debts implode⁴ one after another.

1. A SURPRISING CHANGE OF MIND

- WWW.CIADC.CO -

Everything Obama did in office was focused at overwhelming US debt, including his already failed and amended socialist health/tax programs. Obama added \$8.588 trillion, a 74-percent increase from the \$11.657 trillion debt at the end of Bush's last budget, FY 2009. As of the time of this writing, according to USDebtClock.org the US national debt (publicly admitted, certain liabilities not accounted for) is at \$21.5 trillion. Oh and by the way, Trump plans to add \$8.282 trillion, a 41-percent increase from the \$20.245 trillion debt at the end of Obama's last budget for FY 2017⁵. Trump will add almost as much debt in four years as Obama did in eight years. That would also make Trump the second-biggest contributor to the national debt in history, in just one term!

Is Trump driving the US towards bankruptcy? Yes because Trump, just like every other elite class billionaire, has a deep love for money and its manipulative powers. Christians know by the Word of God that the love of money is the root of all evil. Trump shares this love for money with all elites and the vast majority of politicians. This is truly what they have in common. This is what allowed Trump in the room and in the national spotlight. Is Trump part of the elite globalists that want a one world order? No. I have heard it said, "You know a man by his enemies." Trump is the enemy of the NWO. He has set back their globalist agenda years, only by the grace and wisdom of Jesus Christ. The NWO elitists continue their campaigns and funding of propaganda against Trump's policies and personal life. Deep state attacks and resistance against Trump has completely exposed what many once considered "conspiracy" as the truthful reality.

5. <https://www.thebalance.com/us-debt-by-president-by-dollar-and-percent-3306296>

1. A SURPRISING CHANGE OF MIND

- WWW.CIADC.CO -

So, why is Trump different? Simply put, Trump is religious. Let's discern his mindset in these important interview answers: Trump told CNN earlier that he is both anti-abortion and anti-same-sex marriage, said people are surprised to learn about his Christian faith. "People are so shocked when they find ... out I am Protestant. I am Presbyterian. And I go to church and I love God and I love my church," he said. Moderator Frank Luntz asked Trump whether he has ever asked God for forgiveness for his actions. "I am not sure I have. I just go on and try to do a better job from there. I don't think so," he said. "I think if I do something wrong, I think, I just try and make it right. I don't bring God into that picture. I don't." Trump said that while he hasn't asked God for forgiveness, he does participate in Holy Communion. "When I drink my little wine -- which is about the only wine I drink -- and have my little cracker, I guess that is a form of asking for forgiveness, and I do that as often as possible because I feel cleansed," he said. "I think in terms of 'let's go on and let's make it right.'" ⁶

As you can see Trump is only religious; he will not repent and relies on his own works to make things right. Trump may understand mainstream Christianity but his answers show he does not understand Biblical doctrine. Isaiah 64:6, "But we are all as an unclean thing, and all our righteousnesses are as filthy rags; and we all do fade as a leaf; and our iniquities, like the wind, have taken us away." Our good works can never make us right with God. 1 John 1:7, "But if we walk in the light, as he is in the light, we have fellowship one with another, and the blood of Jesus Christ his Son cleanseth us from all sin." It is being found in Jesus Christ by faith and baptism that we are washed by His blood and are seen by God covered in Christ's righteousness! Amen.

1. A SURPRISING CHANGE OF MIND

- WWW.CIADC.CO -

Trump's pompous mindset is like that of the Pharisees. Even the Pharisees would not "break their laws" and handed the sentencing of Christ over to Pilate for crucifixion to maintain their sense of self-righteousness. Trump's religious experience is based in the Bible, so mindsets like anti-abortion and anti-same-sex marriage are engrained in him, praise be to God!

Romans 13:1, "Let every soul be subject unto the higher powers. For there is no power but of God: the powers that be are ordained of God." And just as God has ordained leaders in the past to answer the prayers of His people, to show mercy, and to advance His will with ultimate authority, God has intervened and ordained Trump. The elites who selected Hillary and planned to reset the markets, crash the dollar, eliminate borders, and legislate socialist programs KNOW that God intervened. They do not like to retain God in their knowledge. They are now at the point of being so unsuccessful and over exposed in their endeavors, that they cannot simply be fighting Trump. Trump has the angles of Lord encamped around him. All the money, bribery, and manipulative powers in the world will not move the will of the Lord. The elitists know this and they have changed their plan because they were forced by the hand of God.

What does this mean for our future? In the long run, nothing. Everything we discussed in the first part of this chapter about the upcoming world-wide depression (that will make the great depression

1. A SURPRISING CHANGE OF MIND

- WWW.CIADC.CO -

look like a church picnic) is still going to come to fruition. THE DIFFERENCE IS IN THE TIMING. The elites were ready to bring it in with Hillary, it was all planned. God intervened. All of the people that educated me about the Federal Reserve, manipulated markets, cryptocurrency, asset allocation, and true liberty are all still saying the same thing. Trump is a puppet. Yes, but Jesus Christ, not NWO, is the puppet master! Trump is bankrupting the US. Yes, but out of necessity of playing the game (simply ditching the dollar is not the wisest path to recovery). Trump does not want a reset, he wants peace and prosperity (hyper-inflated or not). In fact, Trump policies are so fruitful to the economy and big business; the elites are lining up to take advantage of them. Even with interest rates slightly increasing, the elites will continue to utilize cheap-money policies, buybacks, and quantitative easing to boost markets and their fortunes. The integration of future FinTech systems (Blockchain, Artificial Intelligence, Internet of Things) will lead to an even further explosion of worldwide business deals and expanded market cap valuations.

The elitist are along for the ride for two reasons. First, because of their love for money, and lack of any real power or authority to remove the God-ordained Trump from office. Second, because they cannot pull the plug on the markets with Trump in office. Trump will let them fail and not bail them out, again! They are going to take advantage of Trump's pro-business and pro-economy policies to exponentially grow their businesses and fortunes.

1. A SURPRISING CHANGE OF MIND

- WWW.CIADC.CO -

I believe this change of plan includes postponing the planned market and dollar crash until post 2024 when Trump has no more executive powers or control on fiscal policy. It also includes hyperinflating the DJIA to upwards of 50,000 points. Finally, it includes establishing FinTech systems in preparation for an imminent fiat system collapse and a world-wide financial (and perhaps even political) system shift towards technocratic FinTech systems.

I believe that by the will and justice of God, Trump will “Drain the Swamp.” It will come as a surprise to the mainstreamers, but many will be rounded up and tried for their abuse or corruption, maybe even by military tribunals⁷. This action will lead to a 2020 (perhaps even midterms 2018) red wave that will see conservatives and Trump secure a second Presidential term. Trump’s constituents will then enter into a mania. Their faith in him to grow the economy and markets (even if it is done through Federal Reserve manipulation) will spark a wave of investment from the lower classes all the way to the elites. The DJIA at 40K will feel like Bitcoin did in December at 15K and the mainstreamers will experience Fear of Missing Out (FOMO).

As Trump’s constituents and the mainstreamers FOMO into the unfathomably hyperinflated market, the elitists will begin to unload all of their buyback-inflated shares. Start selling your positions at 40-45K DJIA because by 50K DJIA the American low and middle class will be left holding all the worthless paper stock. The elitists will be holding all the cash with which they will use to buy your hard assets and real property. As Trump relinquishes executive power, the markets begin to unfold...unless, and I pray this is the will of God, the US people wake up, repent, and honor Jesus Christ and His Word as our nation’s founding fathers did. This is our chance at revival!

7. Mike Adams - CounterThink. <https://www.youtube.com/watch?v=k6Cz0OwBvkk&t=911s>

2. TRUMP POLICY

If Trump policy remains the same as it has been since 2016, which all things point towards the fact the policies will not only stay but be strengthened, then we will continue to see the same results we see today including the growth of traditional markets and debts.

The Federal Reserve will continue to devalue the dollar by non-stop printing both physically and digitally. Companies will continue to borrow cheap money and buy back their stocks (creates inauthentic demand by lessening supply and hyper-inflating valuations). The masses with delusions of grandeur and a Fear Of Missing Out (FOMO) on Trumps winning business minded policies will invest into all-time highs. All the while, the elites will hand off the overpriced bags to the American people.

Buybacks are the real catalyst here. You can think of a buyback as a company investing in itself or using its cash to buy its own shares. The idea is simple: because a company can't act as its own shareholder, repurchased shares are absorbed by the company and the number of outstanding shares on the market is reduced. Back to basic economics, less supply and increasing demand results in increased price.

J.P. Morgan reports that S&P 500 companies will buy back a record \$800 billion of their own shares in 2018, funded by tax savings, strong earnings and the repatriation of cash held overseas.⁸ That will far exceed the \$530 billion in share buybacks that was recorded in 2017.⁹ Indeed, analysts at Goldman Sachs project that stock repurchases will reach \$1 trillion this year, up 46% from 2017 on the back of tax reform and strong corporate cash flows.¹⁰

8. <https://www.marketwatch.com/story/sp-500-companies-expected-to-buy-back-800-billion-of-their-own-shares-this-year-2018-03-02>
9. <https://www.kiplinger.com/slideshow/investing/T052-S001-10-companies-making-huge-stock-buybacks-in-2018/index.html>
10. <https://www.marketwatch.com/story/stock-market-to-get-1-trillion-boost-via-buybacks-says-goldman-2018-08-06>

2. TRUMP POLICY

Starting in 2004 and leading up to the 2008-2009 crash, there was a substantial increase in buybacks. This helped mask the weakness of the market at the time. Since then, buybacks have exploded and new all-time highs have been set. Trump has not changed this policy. In fact, he has encouraged it. Forecasts are for \$800 billion of buybacks in 2018 and \$1 trillion in 2019. I predict the next five years will see increasing buyback levels similar to 2004-2007 masking the valuations as unfathomable heights are achieved. Pay special attention when they announce a decrease in buybacks, it should be a sign of cyclical correction as it was in 2008.

Exhibit 2: Buyback authorizations have surged in 2018

as of August 2, 2018

Source: Birinyi Associates, Goldman Sachs Global Investment Research

3. FOMO

Trump's "Draining the Swamp" will cause a red wave that secures the House, Senate, and a second Presidential Term for Trump. Thriving market conditions (even going against what all the fake news "professionals" report and forecast) will lead to a wave of investment from those who believe in Trump's policies and business minded leadership. This wave of investment will produce the Fear Of Missing Out (FOMO) on Trump's economy first mindset. The majority of people who have watched Trump do what he said he was going to do will create FOMO investing at all-time highs. They will become the bag holders of the elites who gradually sold all the way up through the hyperinflated market.

Take a look on the next page for a closer look at this 2017 Cryptocurrency Market Capitalization chart. The chart shows how the FOMO takes effect quickly and effectively. It is the tall tell sign of approaching the end of a bull run.

3. FOMO

In the previous chart you could see the amazing yearlong growth and bull run of the 2017 Cryptocurrency market. Here you can see the exponential growth of the market cap due to mainstream media hype and FOMO investing in JUST ONE MONTHS time.

Incredible exponential growth!

3. FOMO

Here is the chart for the Dow Jones Industrial Average. Trump policy is in full swing. The market will continue to defy logic. We can expect a slight break for the 2020 election and then FOMO investing for Trump's second term.

Here is a zoom view from 1989 to 2001 showing the FOMO phase of the Internet bubble. This is the definition of FOMO investing. Smart money entered in the early 1990s and the FOMO investing began in late 1995. As you can see from the above chart, the DJIA was already experiencing healthy growth and was at all-time highs. I think we see a similar FOMO cycle in the coming years.

www.CIADC.co

4. FINTECH

Fiat currency, along with its fractional reserve banking policy and deflationary value, is on the way out. Printing endless amounts of cash and charging people to do so, literally and through interest/inflation, has finally (in God's timing) caught up with the Federal Reserve and the central banker elites worldwide. The rich have oppressed us systematically (James 2:6). They have hyperinflated the current system to build the infrastructure of the United Nations and the New World Order. Their derivative and debt-based system has been pushed to the limits by design with record high worldwide debts waiting to implode. This realization will manifest eventually but not until the Federal Reserve and the lenient Keynesian fiscal policies that are currently in effect are put to an end.

When it finally comes to an end, will the bankers lose? No! They are playing 4D chess and everyone else (distracted by life) is playing checkers. The bankers are the ones who are developing and manipulating this new technological system. Not even 10 years ago, many called the theoretical cryptocurrency movement the "War on Cash." Some even labeled it malicious and warned of the dangers of such progressive technology and the level of control that comes with it. They were 100% right to sound the warning bell. Today their warnings are overshadowed by massive profits and an inflationary currency that can benefit all users and the worldwide economy.

People are tired of the current debt-based fiat system. Cryptocurrencies have quickly shifted from being a threat of ultimate control and a leader of the "War on Cash" to become the "people's choice" and the seemingly solution to escape from the crash of the broken fractional reserve fiat system.

4. FINTECH

Cryptocurrency today is in the same place the internet was when people first began to realize its full potential. At first it was not that popular and there was no huge profit-generating market formed (like we see today with money made online from Cyber Monday). It took the formation of user friendly operating systems and web browsers, like NetScape, AOL, and Internet Explorer to include the masses. These applications allowed for easy access to content and online markets for the widespread adoption, acceptance, and use of the internet. From there the rest is history.

I believe that after Trump is re-elected in 2020, there will be a boom in technology. I believe Trump will allow for the release of several advanced technologies that the CIA and DARPA have been sitting on for years. During this time, I think Trump will open up the doors for Financial Technologies. The official merging of traditional markets along with revolutionary blockchain technology will open up businesses on a world wide scale like we have never seen. Recently, Apple became the first trillion dollar company. After Trump policy enables FinTech for mainstream adoption and acceptance, I think there will be multiple trillion dollar valuations because of the vast and secure networks/platforms that blockchain will provide for everyday users.

In the short-term, Blockchains and Cryptocurrency are financial freedom and an escape from the imminent collapse of the debt-based fiat system. In the extended long-term, cryptocurrencies combined with the law are a systematic control system. The Antichrist will eventually use these tools to fulfill prophecy by being able to control if one can buy or sell. What the world intends to use for evil, God if he wills, can use for good. There is NO DOUBT we are witnessing the early embryonic stages of the future financial system.

5. TRADITIONAL STOCK PORTFOLIO

This content is for CIA Members Only.

———— www.CIADC.co ————

CONCLUSION

In this SPECIAL REPORT – Trump Bump Panic: Riding Trump Policy, Buybacks, FinTech, and FOMO to 45K DJIA, I conclude that:

1. The elite central banking globalist cabal has been forced to change their plan for a market crash and reset because of the direct intervention of God ordaining Trump as the US President.
2. Trump's pro-economic policies will continue to defy analysis and result in continued Federal Reserve interest rate manipulation, quantitative easing, record buybacks, and eventually a FOMO investment bubble to end the FED stimulated bull run.
3. Trump will surprisingly "Drain the Swamp," causing a red wave of social government activism that will secure his second term. After his re-election, Trump will release technologies including FinTech (Blockchain, AI, IOT) for mass adoption and acceptance.
4. The DJIA will go to 50K points. Sell by 45K! Elites will begin to sell their shares around 40K DJIA and by the time we hit the top of the FOMO investment bubble at 50K DJIA, the optimistic middle class will be left holding the bags. The elites will have stolen the wealth of their greatest enemy, the free thinking American middle class.

When Trump finally relinquishes his executive powers and the God-ordained leader is no longer in the way, the elites will then, if it be the will of God, have the authority to commence their original plan to crash the debt-based fiat systems. This will allow the newly popularized and trustworthy FinTech to carry humanity into the technocratic future. The next six years may prove to be the most prosperous times the world has ever known (from a market valuation perspective). If so, it is a blessing from the Lord that we should use to testify of His Glory, Grace, Mercy, Majesty, and Love. Stay alert. Stay awake. Stay in the Word, and profess ALL the good news!

UPDATE

DEC. 19, 2018

TRUMP BUMP REPORT - MARKET HEDGES

Everyone who follows the markets knows the common variables of what is typically referred to as the "business/market cycle": rally, bubble, euphoria, peak, recession, bull trap, bear market, collapse, economic crash, depression, etc. We can also pile on the debt/credit bubble crisis and potential global reserve currency shift as unique potential outcomes of the upcoming cyclical recession in the USA.

Everyone knows why it is going to happen, some may even know how it is going to happen, but no one knows when it is going to happen!

The most important focus in the Trump Bump Special Report was its timing.

Remember, CIA shares the same conclusions as those great thought leaders mentioned in the report. The difference in opinion is the difference in the timing of the cyclical correction or crash.

Well time is running out on President Trump. With the democrats taking control of the house on Jan 3, 2019 they will most likely begin impeachment proceedings soon after. That's not to say the democrats will successfully impeach him, they will probably not have the votes in the Senate for it to pass barring any groundbreaking evidence coming to light that they could not muster up, make up, force, or coerce over the last two years during the Mueller investigations. These investigations could further slow economic growth outlook not only for the US but also the world.

———— www.CIADC.co ————

UPDATE

DEC. 19, 2018

Since we have published the Trump Bump Special Report on October 1st, 2018 the Premium Stock Portfolio is down 15%. It has outperformed the overall markets of which some have declined 20% prompting the bears to increase their aggressive tone and whistleblowers, like Jeff Berwick and Ron Paul, to begin to ring the warning bells. The interest rates on the 2yr and 5yr bonds is nearly inverted, and probably would be fully inverted without the FED pegging short-term rates. These are all important indicators.

In short, there are enough warning bells going off in the market to establish solid hedge positions. If the truth fails to gain traction in the mainstream conscience, the swamp will never be drained. HOPE REMAINS in that there are countersuits against Mueller's corruption and public calls for further investigation into the Clinton Foundation for tax fraud and pay-to-play politics. The fate of our nation may very well rest on the faith and prayers of the saints, even so, may His will be done on Earth as it is in Heaven. Enough politics!

The fact that I have to talk politics to address traditional market outlook shows the lack of understanding of the true price valuation of stocks which is actually based on mainstream sentiment, news, and political outlook instead of financial data and analytics.

Back to the Market!

The easiest way to hedge the premium stock portfolio with low risk/high reward is by trading ETFs with added leverage against the underlying indices. These are not options they do not expire, so you can hold them until the inevitable roller coaster drop begins.
